## Story 4: Choose a doctor

---

As a user

I'm able to choose a doctor from the doctors overview

So that I can make an appointment with them.

Wireframe

Acceptance Criteria

-the user can book the appointment with the doctor through the button on their profile

-the button directs to the 'make appointment' page, with the doctor already being chosen in the dropdown list

-the start and end date must be in the future

-end date should not be before start date

-if the doctor is booked for that time, an error message is displayed.

-additional comments are optional
